Parent Approval

I am so glad my child was able to be a part of the BEE SMART program this summer. He has greatly enjoyed all of the new experiences, and has come home every afternoon excited to share all of the interesting things he learned that day with me. I [also] appreciate the valuable information from the [family] workshops.

– Lakeland parent

BEE SMART is the absolute best program out there . . . My granddaughter has loved it and my grandson will definitely reapply next year. Thank you!

– Maree G. Farring

Baltimore Environmental Education Summer Math And Reading Trailblazers

BEE SMART is a Living Classrooms summer program that operates out of the Masonville Cove Environmental Education Campus. Funded in part by MSDE/s 21st CCLC, BEE SMART serves 80 rising 3rd through rising 5th grade students from two Title I partner schools: Lakeland Elementary Middle and Maree G. Farring Elementary Middle Schools.

BEE SMART uses E-STEM as a vehicle to raise participants' reading levels during the summer, a time when students from low-income families often fall behind . . .

100% of parents/guardians indicated that, at BEE SMART, their child is “expected to do their best”.
