

Teen Student Financial Literacy Needs Survey

Conducting a survey is one way to determine the existing knowledge about financial literacy concepts among participating students. It is important to inform participants that the survey is simply to inform the design of the financial literacy activities. Leaders should also consider putting surveys into a digital format that will automatically tabulate results and provide options to create graphs and tables for use in reports and presentations.

Below are a few guiding questions for determining the financial literacy needs of participants. You can modify the questions to fit your program needs.

Teen Student Financial Literacy Needs Survey

We want to create awesome financial literacy program activities and provide the best learning experience possible! To help us do that, please tell us what you already know about money and financial practices. We will use your answers only to help develop financial literacy activities that fit the needs of our student community.
